MACO
ESPAGS
ESPAGNOLETES

What is the ultimate Espagnolette Locking System?

R.A.I.L.
Reverse Action In-Line

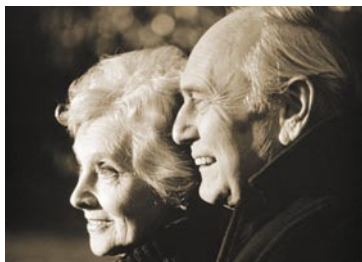

**MACO
ESPAGS**

R.A.I.L. – for when BS7950 security windows are required without the need to fit a shootbolt espagnolette. The reverse action operation pulls the cams together, clamping them into both sides of the striker plate for strength and security.

The design of the **R.A.I.L.** espagnolette makes it ideal for use on commercial applications, new build installations and public sector housing.

R.A.I.L. uses the existing range of MACO striker plates and is suitable for all types of eurogrooved profiles making it ideal for use not only on PVCU profile systems but also Timber and Aluminium.

R.A.I.L. – The ultimate Inline Espagnolette
Locking System

Simply perfect for all systems

The symmetrical design ensures a fast and simple fabrication process

The **R.A.I.L.** lockcase features twin central adjustable mushroom bolts on the 200, 800, 1000 & 1200 mm long sizes.

Twin adjustable end mushroom bolts are fitted on all sizes from 400 mm and above.

Combinations

Backset: 20 and 22 mm

Mushroom Bolt Height: 7.7, 9.0 and 10.5 mm

Sizes:

Gr. 1 – 200 mm

Gr. 2 – 400 mm

Gr. 3 – 600 mm

Gr. 4 – 800 mm

Gr. 5 – 1000 mm

Gr. 6 – 1200 mm

Windows in open and closed position with MACO R.A.I.L.

OPEN Position

- When the window is in the open position the **R.A.I.L.** mushroom bolts are positioned on either side of a standard MACO mushroom striker plate.
- The distance between the mushroom bolts is the same as our MACH II Shootbolt System thus ensuring a smooth and trouble free operation.

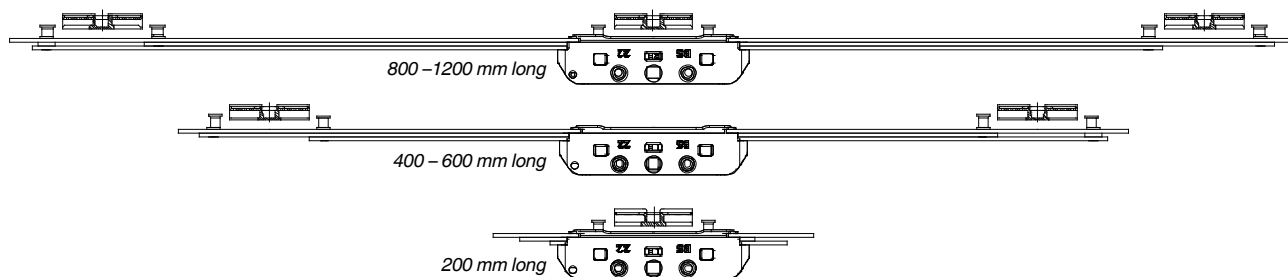

CLOSED / LOCKED Position

- When the window is in the closed / locked position the **R.A.I.L.** mushroom bolts enter both sides of the striker plate.
- This locking action that was developed by MACO on the MACH II Shootbolt System ensures that when the window is forced one of the mushroom bolts engages further into the striker plate.

R.A.I.L. Espagnolettes
